RESEARCH EXPERIENCE

Los Alamos National Laboratory (Theoretical Division) 2022 - Present
Postdoctoral Researcher *Los Alamos, USA*

Tel Aviv University 2019 - 2022
Postdoctoral Researcher (IASH Postdoctoral Fellow) *Tel Aviv, Israel*

VISITING EXPERIENCE

Weizmann Institute of Science 2022
Short-term visitor (two months), host: Kfir Blum *Rehovot, Israel*

Brown University 2018 - 2019
Long-term visitor (KITPC Travel Award), host: JiJi Fan *Providence, USA*

Boston University 2018
Short-term visitor (three months), host: Martin Schmaltz *Boston, USA*

Dartmouth College 2017 - 2018
Long-term visitor (KITPC Travel Award), host: Marcelo Gleiser, Devin Walker *Hanover, USA*

EDUCATION

Virginia Tech 2013 - 2017
Ph.D. in Theoretical Physics, Advisor: Tatsu Takeuchi *Blacksburg, USA*
· GPA: 3.8/4 · Degree date: May 13, 2017

RESEARCH AREAS

Astrophysical constraints of axion and dark matter
· supernova remnant echo *v.s.* axion dark matter stimulated decay
· cosmic distance measurement *v.s.* axion-photon coupling
· galaxy velocity dispersion *v.s.* ultralight dark matter

Laboratory search of axions
· axion-magnetic resonance *v.s.* light-shining-through-walls experiments
· muon g-2 *v.s.* axion EFT and completion

Gravitational wave from BSM sources
· neutron star binary mergers *v.s.* long range force
· gravitational wave of boson stars *v.s.* axion potential

Neutrino phenomenology and EFT
· solar neutrino *v.s.* monopole
· solar neutrino *v.s.* large non-standard interaction
· DUNE *v.s.* supernova neutrino

BSM Theory
· Pati-Salam extension from noncommutative geometry

GRANTS

· Israel Academy of Sciences and Humanities (IASH)
Foreign Postdoctoral Fellowship (*top 25% awarded*) USD 100,000 2019-2021

· China Postdoctoral Science Foundation
International Travel Research Award (*top 5% awarded*) USD 46,000 2017-2019

HONORS AND AWARDS

· Clayton Williams Graduate Fellowship (*2 in 50 awarded per year*) 2015-2016

· Sigma Xi Outstanding Ph.D. Research Award (*1 in 30 awarded per year*) 2015

PUBLICATIONS

*Authorship is in **alphabetical** order following HEP standard unless noted otherwise.*

H-index: 17, citation: 26.2 per paper. Up-to-date list can be found here

** : CS as the leading contributor equivalent to a "first author"*

† : CS as first author following astrophysics convention

Novel lab probes of axions

25. * H. Seong, **CS**, and S. Yun, "Axion Magnetic Resonance: A Novel Enhancement in Axion-Photon Conversion," arXiv:2308.10925 [hep-ph]

Novel astrophysical probes of axions

24. † **CS**, M. Buen-Abad, and J. Fan, "Probing New Physics with High-Redshift Quasars: Axions and Non-standard Cosmology," arXiv:2309.07212 [astro-ph.CO]
23. * N. Bar, K. Blum, and **CS**, "Galactic rotation curves versus ultralight dark matter: A systematic comparison with SPARC data," *Phys. Rev. D* **105** no. 8, (2022) 083015, arXiv:2111.03070 [hep-ph]
22. * M. A. Buen-Abad, J. Fan, and **CS**, "Axion echoes from the supernova graveyard," *Phys. Rev. D* **105** no. 7, (2022) 075006, arXiv:2110.13916 [hep-ph]

TEACHING EXPERIENCE

Student Mentoring 2017-current
I have co-supervised two undergraduate students (Nizar Ezroura, Parker Gardner) during 2017-2018 and two PhD students (Joel Barir, Luca Teodori) 2019 - 2023. This includes collaborating on projects and regular discussions on career development in general.

Electromagnetism 2016
I was an external project consultant of the project "Modeling of Eddy Current Separation" in the Mining Engineering, Virginia Tech. I tutored the Ph.D. candidate, Selahattin Baris Yazgan, for the magnetic response and Eddy current during the Summer (April to September) of 2016.

Electromagnetism 2016
I performed independent recitation sessions for Prof. Leo Piilonen's undergraduate course Electromagnetism. I also worked as a lecturer to cover Prof. Piilonen's work travel for Belle II experiment.

Mathematical Methods 2015
I performed independent recitation sessions for Prof. Tatsu Takeuchi for the course of Mathematical Methods, intended for physics major undergraduate students. I also worked as a grader for the homework and exams for the course.

Modern Physics Laboratory 2014
I guided non-physics major undergraduates through modern physics laboratory. I also rated the laboratory reports.

OUTREACH AND COMMUNITY

LANL 2023 Student Symposium 2023
I participated the student summer program at Los Alamos National Laboratory. I was in charge of the mathematics project session at the final presentation and served as a judge to determine the final student award.

Summer STEM Circles @ Santa Fe Community College 2023
Guest speaker at the summer camp "Patterns: The Intersection of Art and Math" for middle school and high school students. The title of my presentation is "What I Learn from STEM Education".

LANL-Utah-Rice Joint Journal Club 2023-present
I have initiated LANL-Utah joint journal club. I have been the organizer of the joint journal club where the groups at both institutes join remotely to discuss latest arXiv paper and form new projects.

Cosmicdicord.net 2019-present
A blog that features background of my research, fun facts of astroparticle physics, as well as tutorials of simple coding projects.

Women in Science Project (WISP) 2018
Introduction of physics research to female starting undergraduates. Co-mentoring short term interns from selected groups.

Dartmouth-TRIUMF HEP Tools Bootcamp 2017
One of the three organizers. Invited authors of computational programs in both high energy physics and cosmology to give online lectures series through the Vidyo platform. The workshop had nearly 200 participants from six continents and received very positive feedback.

SCIENTIFIC PROGRAMMING

Languages	`Python, C, bash, MATLAB, C++, Mathematica`
ODE Solving	Shooting and relaxation for Singular Boundary Value problems
Boltzmann Solver	`CLASS`
MCMC	`emcee`, `MontePython`, `GENIE`, `MadGraph`
Parallel Computation	`mpi4py`, `multiprocessing`, `ipyparallel`, `TensorFlow-GPU`
Machine Learning	`TensorFlow`, `Keras`
CMB Analysis	`healpy`
Data Acquisition	`Scrapy` web scraping, `Regex` parsing
Data Simulation	CMB pixel level local non-Gaussian map simulation
Data Sets	BOSS DR12 (real/k space), Pantheon SNIa, SPARC, Bonamente galaxy clusters, Green's Catalog of SN Remnants, Planck 2018 likelihood, Borexino Phase II

SAMPLE CODE

BΛCDM and BSM in Quasars 2023
- Compute the cosmic distance inference with quasar data set
- MCMC test of axion, wCDM, and cosmographic model

Numerical Solver for Axion Magnetic Resonance 2023
- Solving the axion-photon oscillation in a spatially varying magnetic profile
- Test it in the monochromatic (laser) and extended energy spectrum (solar)

Ultralight Dark Matter from Galaxy Dispersion 2022
- load and parse SPARC data set
- construct χ^2 estimator and perform Frequentist analysis using `emcee` as a smart grid

Axion Echo from Supernova Remnant 2021
- regex parse SNR catalog (Green 2019), scrapy crawler of SN data, process of Haslam 408 MHz map
- construct supernova remnant light curve, compute echo signal from stimulated decay

Constraining Axions from Cosmic Distance Measurement 2020

· construct axion-photon conversion model inside IGM and ICM
· load and process Pantheon, Bonamente galaxy clusters, BOSS DR12
· perform Bayesian and Frequentist analysis with `emcee` sampler

Self-gravitating Bose-Einstein Condensate Solver 2019

· relaxation solver of Bose-Einstein condensate system with two axions
· shooting solver of Bose-Einstein condensate system with one axion, stiffness detection and switch
